PROFESSIONAL SUMMARY

Software Developer with hands-on experience building production web applications using React.js, Next.js, and Node.js. Skilled in microfrontend architecture, headless CMS integration, GraphQL/Apollo, and REST API development, with a track record of measurably cutting code duplication, rebuild overhead, and manual workflows. Strong foundation in OOP, DBMS, and Agile delivery, with proven cross-functional collaboration and a habit of shipping performance-optimized, accessible applications (consistent 90+ Lighthouse scores).

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React.js, Next.js (Monorepo/Microfrontends), HTML, CSS, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL, Apollo Client, Socket.IO

CMS & Data: Strapi CMS (headless, multilingual), Frappe/ERPNext, MySQL

Tools & Automation: Git, GitHub, Postman, n8n, Webhooks, GA4

Core Concepts: SDLC, CI/CD, DBMS, OOP, MVC Architecture, Agile/Scrum, Web Performance Optimization

WORK EXPERIENCE

Graduate Engineering Trainee (GET)

LMNAs Cloud Solutions, Tharangambadi, India

- Built a microfrontend architecture on a Next.js monorepo, unifying the website and blog into a single codebase with shared components, cutting code duplication by ~50% across both applications.
- Configured a headless CMS from scratch for multilingual content (English + German) across 18 pages with webhook-based on-demand revalidation, eliminating ~80% of production rebuilds.
- Built a GraphQL query factory with Apollo Client that auto-generates typed queries per content schema, removing repetitive boilerplate across all content types.
- Integrated ERPNext for live job listings, replacing manual developer deploys with real-time data sync.
- Built an AI-driven content generation and approval workflow using n8n, automating post creation, approval/rejection routing, and feedback-based revisions.
- Designed automated GA4 reporting workflows with scheduled dashboard delivery, supporting data-driven decisions.

PROJECTS

Scrum Poker — Real-Time Planning Tool — Next.js, Socket.IO, TypeScript, Node.js, Express | [Live Demo](#) | [GitHub](#)

- Built a real-time planning app with Socket.IO room management, hidden voting, and moderator controls; achieved 100/100 across all Lighthouse categories with 0.42s LCP, 0 CLS, and 48ms INP; deployed on Render.

Personal Portfolio Website — React, JavaScript, Google Analytics 4 (GA4)

- Developed and deployed a high-performance portfolio site achieving Lighthouse scores of 97 (Performance) and 100 (SEO & Best Practices); integrated GA4 with an automated n8n workflow for periodic analytics reporting via email.

Privilege Escalation Attack Detection — Python, Ensemble Learning, AWS. Built an ML-based anomaly detection system using ensemble models to flag privilege escalation attacks from system logs; deployed on AWS S3.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering

A.V.C. College of Engineering, Mannampandal, India | 2021 – 2025 | CGPA: 8.13

CERTIFICATIONS

Build an AI Agent with n8n (LinkedIn Learning) | The Complete Full-Stack Web Development Bootcamp (Udemy) | Python Development (ICT Academy) | Python Object Oriented Programming (LinkedIn Learning)

ACHIEVEMENTS

Best Outgoing Student, B.E. (CSE), A.V.C. College of Engineering (2021–2025) | Smart India Hackathon Finalist 2023 & 2024
Runner-up, Paper Presentation, HacTec'24, EGS Pillay Engineering College | Languages: English, Tamil (Native)
